BUSINESS REVIEW

The Group offers a comprehensive and wide range of services to meet its customers' needs, including air/sea freight forwarding and related services, trucking and warehousing related services. In addition, the Group provides value-added services such as supply chain management services including pick & pack, distribution and stock & inventory report, security escort services and tracking services. These services are complementary to one another, and provide customers a wide range of services with cost savings. Although the freight forwarding industry in Malaysia is highly fragmented and competitive, in particular, we directly and indirectly compete with other integrated logistics service providers on a local, regional and international basis in the form of pricing, range of services provided, information technology and network of customer, the Group implement the logistics service in Hong Kong with the intention to strengthen the market position. The Group closely monitor the market situations and make necessary adjustments to its strategies and operations.

For the nine months ended 30 September 2021, our integrated logistics services can be broadly categorised into (1) air freight forwarding and related services; (2) sea freight forwarding and related services; and (3) transportation and warehousing related services.

Such revenue is mainly driven by the volume of goods, type of services provided, type of cargo, among other factors.

	2021	2020
	TEU	TEU
Sea freight shipment volume		
(a) Export	4,467	6,633
(b) Import	4,149	5,988

3. Trucking and Related Services

(i) *Trucking and Related Services*

The Group’s trucking and related services can be divided into two categories: (i) supporting service for its freight forwarding business; and (ii) service which does not involve sea freight or air freight.

Majority of the transportation revenue was from the supporting services for the Group’s freight forwarding business including income from haulage and trucking services. Such revenue has been taken into account as part of the revenue generated from the air/sea freight forwarding services provided by the Group.

The revenue from the trucking services which does not involve air freight or sea freight accounted for approximately RM14.0 million and RM19.5 million for the nine months ended 30 September 2021 and 2020, respectively. Revenue from such services mainly consists of delivery fee for trucking services. Such revenue is mainly driven by the volume of goods delivered, and the numbers of trips and types of customers served, among other factors.

(ii) Warehousing and Related Services

The Group's warehousing business mainly serves a supporting role for its freight forwarding services. The Group's warehousing services provided in Port Klang mainly consisted of general warehousing services. The warehousing services provided in Kuala Lumpur and Penang airports mainly served as temporary storages of goods for the Group's international air freight business. Therefore, revenue from the Group's warehouse business only accounted for an insignificant portion of less than 1% of the Group's total revenue for the nine months ended 30 September 2021 (2020: 1%).

MANUFACTURING AND TRADING OF PLASTIC PRODUCTS

FUTURE PROSPECTS AND OUTLOOK

In the first nine months of 2021, the Group continues to see increasing challenge with the unprecedented impact of COVID-19 on the global economic outlook, which also impacted the general economic and market conditions in Malaysia and Hong Kong and the industry in which we operate.

The third quarter of 2021 continues to be confronted by the impact of the COVID-19 pandemic. Management is continuously monitoring the situation and strengthen the position as an integrated logistics solutions service provider in both Hong Kong and Malaysia. The Directors believe that there are (i) still plenty of room for growth for business in Penang given the fact that companies continue to set up new manufacturing plants in Penang; (ii) new business opportunities in Malacca, Johor and border of Thailand upon opening up of the borders of the ASEAN countries; (iii) new business opportunities with Chinese and international clients with widening the borders of the ASEAN countries. To achieve this, the Group intends to further expand its business in major gateways of Malaysia and China and expand the scope of services to cover cross border trucking, haulage and rail freight.

Besides, the Group has an intention to expand the logistics business in Hong Kong in order to absorb more Chinese and international clients. The Board is of the view that the logistics business will broaden its revenue base. It is expected that it may also improve the capital usage efficiency of the Company and generate additional investment returns on the idle funds of the Company.
